April 30 – May 1, 2019

PERSPECTIVES ON EXPERIENTIAL LEARNING

Join us for two days of deep dialogue and practical working sessions as we explore many different aspects of experiential learning (EL).

This conference is designed to provide you with opportunities to improve your pedagogy, practice and approach associated with experiential learning (EL). Topics to be covered include politics and policy, relationships with industry partners, community-engaged learning, work-integrated learning, assessment of student learning, and inclusivity in EL.

During the conference, we will discuss questions such as:

- How are we defining experiential learning (EL) across the province?
- What are the best pedagogical practices associated with EL?
- How do we assess student learning and measure the impact of EL on our learners and on the community?
- How do we navigate working with stakeholders to define the intended learning outcomes for engagement in EL?
- How can we assess potential risk to community partners and to learners?
- How do we make EL opportunities inclusive of all of our learners?
